

## Notice to Mariners 004-2021 ADCP DEPLOYMENT

	ADCP1	ADCP2
<b>Latitude (WGS84 datum)</b>	57.147364° N	57.142870° N
<b>Longitude (WGS84 datum)</b>	7.295612° W	7.250159° W
<b>Approx seabed level</b>	-5mCD	-25mCD

Mariners are advised that week commencing 22<sup>nd</sup> November 2021, Partrac on behalf of Aspect Land and Hydrographic Services (ALHS) will be on site to deploy 2no. Accoustic Doppler Current Profiler (ADCPs) in the locations noted above. The works will be undertaken by the workboat MV Alyssa and are scheduled to last 2 days weather permitting. The ADCPs will sit on the seabed in steel frames and lit buoys will be installed to mark the locations of the ADCPs.

The marker buoys will be yellow in colour and 1.2m high from the waterline, fitted with a radar reflector, yellow cross topmark and a yellow light, group flash 5 every 20 seconds with a range of 2 miles (FI (5) Y 20s 2M).

The ADCPs will remain in place for a period of 12 months. ALHS will undertake maintenance every two months.

During the period of the works the master of the workboat will maintain a radio watch on channels 16 and mariners navigating in the vicinity of the works are requested to do so; approach with caution and regulate their speed to minimise the effects of wash and stay well clear of the workboat.

ADCP 1 is located within the area for which Lochboisdale Development Limited are the Statutory Harbour Authority and ADCP 2 is out with any Statutory Harbour Authority area. The ADCPs are being deployed as part of project being undertaken by Caledonian Maritime Assets Limited and they can be contacted for further information using the contact details below
